						* Standard Equipment with all systems dry.				

## One of Apache's Outstanding Features is Not a Tent

It's generally thought that a folding trailer utilizes tenting to surround the bed and upper walls. The Apache Solid State construction eliminates the inherent problems with tenting. Apache's tough Royal Thermo-plastic is not subject to shrinking, seams tearing, mildew or broken zippers. Rugged Royal gives you a stable, dry, comfortable and secure place for you and your family and only Apache gives you this solid security in the bed ends where you sleep.

Apache's attention to solid construction doesn't stop there. The supporting structure of the body and roof is aluminum, not wood or styrofoam touted as laminated construction. It's easy to get in and out of an Apache which has the widest door in the industry. Notice the high, easy to work at counter tops. The list goes on and on. Look Apache over carefully, try to compare. You'll find there is no comparison. Honest Injun.
